### Features:

- Pivot arm length to create correct geometry which keeps the head always facing the operator, providing easier and safer control
- Plunge and motor controls located in the handle for easy operation and fail-safe shut off when the handles are released
- Quick change speed adjustment for wood or metal door application
- Numerous options to customize the machine for your specific shop requirements

The 3800 Door Lite Cut-out Machine cuts wood and steel doors for lites, lock bores and deadlock bores, including latch drill and faceplate mortise. Using interchangeable templates, doors can be cut out for virtually any lite configuration--all from one operator location. The combination of speed and flexibility provided by the 3800 Door Lite Cut-out Machine has made it the machine of choice for many of the nation's leading door manufacturers and distributors.
